People change and develop throughout their lives as a result of encountering and even challenging new experiences. On reflection, it can be said that our experiences form an important part of who we are. The world is full of so many wonderful experiences which can bring us lots of positive effects. For example, taking up a new interest or hobby can be a great way to nurture self-development. Participating in new sports such as swimming or tennis can help you to develop a new skill that you thought you never had. Creative interests can demonstrate one's flair for creating something from scratch, whether it be a recipe or a piece of art.

Some experiences will lead to an individual gaining new knowledge about cultures through studying abroad or engaging in international events in the community. Knowledge of cultures can really broaden our perspective and also allows us to see our shared values. Not to mention, such experiences inevitably bring us into contact with new people. Meeting new people is a fundamental aspect of self-development as we communicate with others.

We often get used to our daily routines and ways of seeing things but new experiences are all around us; waiting for us to try. So, if you would like to learn new skills, gain new knowledge about the world and meet new people, start thinking of what new experience you could do.
