正答表 Answer Key

※の欄には何も記入しないこと。記入した場合は採点の対象となりません。

Do not write anything in the spaces marked with ※. If you write anything in the spaces, it will not be graded.

Question Numbers				Answers				Marks	
				最も適切な答えに○を付けなさい。 Circle the best answer.					
1	Part 1 Dialogues	Dialogue 1	Question	A	ⓑ	C	D	5	
		Dialogue 2	Questions	1.	A	B	ⓒ	D	5
				2.	A	B	ⓒ	D	5
	Part 2 Passages	Passage 1	Question	A	ⓑ	C	D	5	
		Passage 2	Questions	1.	A	B	ⓒ	D	5
				2.	A	ⓑ	C	D	5
		A	Questions	1.	A	B	ⓒ	D	5
	2.			A	B	C	ⓓ	5	
2	B	Questions	1.	Ⓐ	B	C	D	5	
			2.	A	B	C	ⓓ	5	
			3.	A	B	ⓒ	D	5	
			4.	Ⓐ	B	C	D	5	

Recent events have led more and more people to buy goods online or to use electronic money in stores, leading to very few people handling cash in their daily lives. People are far more likely to have access to funds in the form of a card or even tethered to a smart device. This has changed the way we use and think about money. I feel that using electronic money is mostly a positive tendency but there is still a use for cash in society.

One positive point of electronic money is that it is truly easy-to-use. You can pay for purchases at the register or online with the swipe of a card or smart device, such as a watch. This has the benefit of not having to worry about handling cash or receiving a sum of money in change. This is especially evident when catching a train or bus. In some countries, bus drivers will not even accept a banknote if it is too large.

Moreover, the rise of electronic money has led to a lot of companies competing so there are many different choices of technologies and services for e-money. Often, you can use each service via a smart phone, so overall, the e-money is accepted widely in cafes, retailers etc. Of course, there may be some small businesses that still only accept cash.

Although electronic money is very convenient, it is not always easy to keep track of spending and how much you have left. You can know exactly how much money you have left with cash. However, many people now have applications installed that can tell them a lot of data about their spending habits so I guess electronic money is useful in that regard.

In conclusion, using electronic money is mostly a positive tendency and I will continue to use it but cash still has a purpose particularly in how we use and view money but I feel that as technology progresses so too must how we buy things.
